

Sustainable Management in Extractive Industries

Michael Tost

Montanuniversität Leoben, Austria

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement n° 101003622

Sustainable Management in Extractive Industries

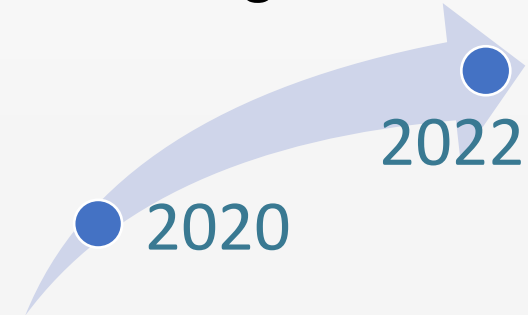

H2020 project

- Responding to important **societal challenge** – raw material demand and sustainability
- Diverse stakeholder representation
- Community of practise

Running from

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement n° 101003622

Our Objectives

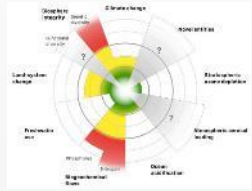

- **Strengthen policy coordination and agenda setting along the mineral extraction value chain**
 - Definition and operationalisation of **sustainable management in the EU context**
 - **Clustering with other projects** to identify good practices and good practise principles
 - **Policy analysis, good practises and use cases**
 - Development of a **digital toolkit**
 - Establishment of a **Community of Practice (CoP)**
-

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement n° 101003622

Definition and operationalisation of sustainable management in the EU context

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement n° 101003622

Clustering with other projects to identify good practices and good practise principles

- **Meta-analysis** of EU, member states and regional projects
- **Raw materials**, but also projects in the areas of **land use / landscape planning, environmental planning, regional development and socio-economic policy research**

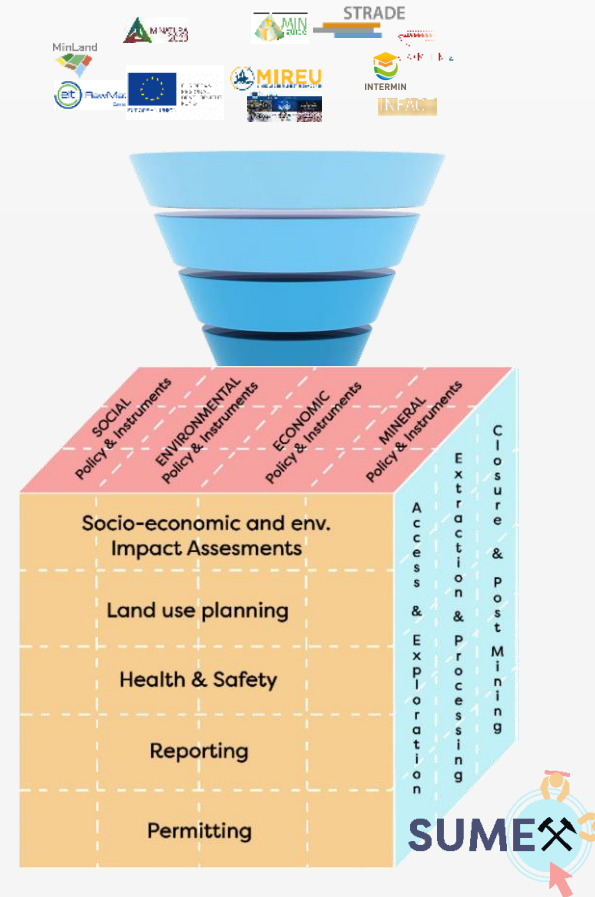

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement n° 101003622

Policy analysis, good practises and use cases

- Social, environmental, economic and mineral **policies**
- Five policy **focus areas**
- **Battery and construction materials** use cases
- Extractives **value chain** coverage

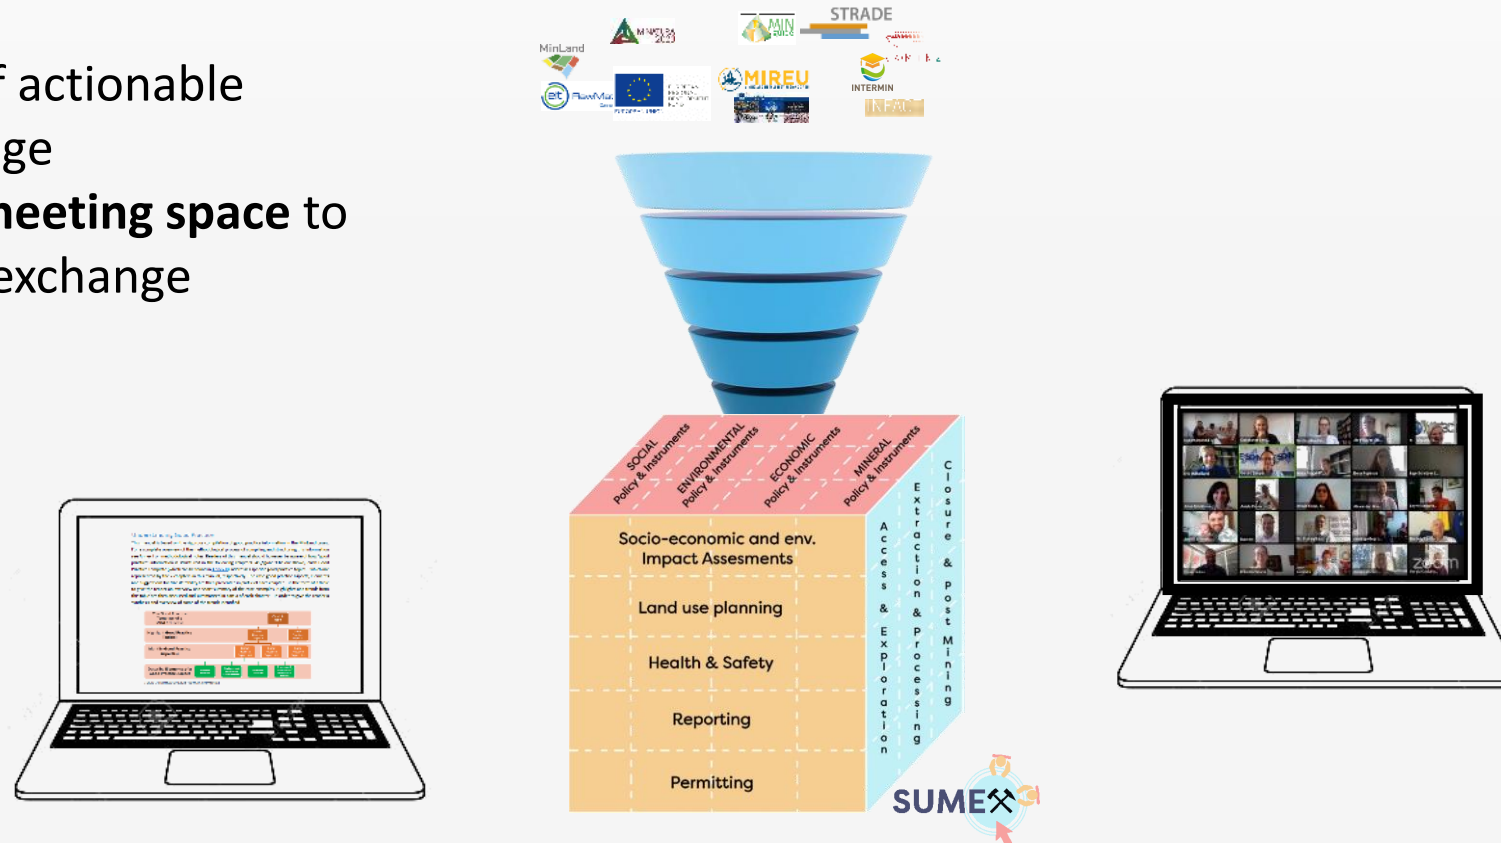

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement n° 101003622

Development of a digital toolkit of good practises and principles

- **Portal** of actionable knowledge
- **Digital meeting space** to learn & exchange

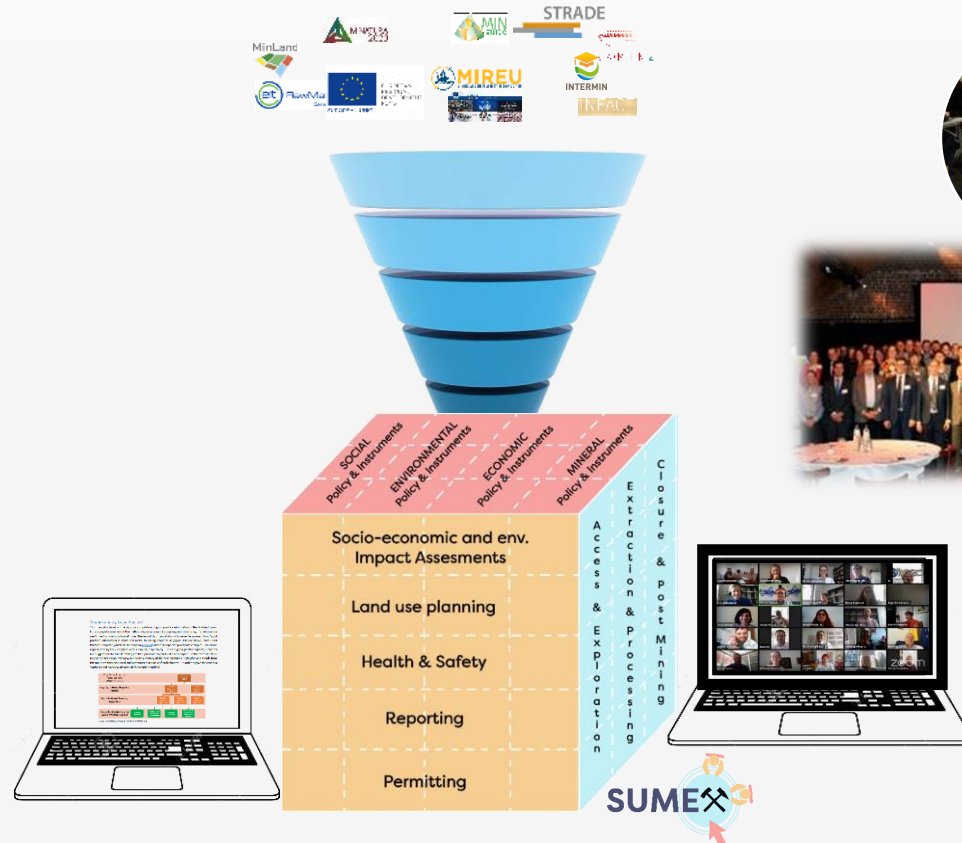

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement n° 101003622

Establishment of a community of practise (CoP)

- **Leaders and Learners League (3L)**
- **Engagement and peer learning**
- **Webinars, workshops and conferences**
- **Newsletter, videos, reports, policy briefs, etc.**

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement n° 101003622

What is in it for you?

Engage and shape what
SD means for European
Extractives Industry

Learn about good
practises to apply them
in your work

Show good practices of
your projects and
operations in a
consolitated way

One stop shop

Possibility of certified
continuous
professional
development (CPD)

Engage in multi-
stakeholder discussions
in a likeminded
community of practise

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement n° 101003622

Launch Meeting

- 17 November, 9.30-12.30
- Livestream on Facebook @ <https://fb.me/e/cXffMlejR>
